SS102: The sign that's got everyone's attention. Now BelliCorp's best selling signage product with thousands of units sold.

The SS102 is a high intensity retroreflective sign printed on thick, durable 12 gauge (0.080") aluminum.

All graphics and text are printed using high quality vinyl, film, or inks designed to last and are resistant to UV and fading, chemicals, and water. Aluminum signs are designed for durability and won't rust or crack and lasts longer than other materials. This sign is designed for wall, post/pole, and fence mounting.

The SS102 is a high quality, photorealistic sign that's been professionally engineered. This is a flat textured sign which uses 1 land impact (LI/prims) only.
