1. Introduction

VirtualWorx Limited Time Vendor let you sell products with a special and attractive price for a limited amount of time. This will attract customers not only to buy your product at the special rate (and tell it to friends) also can see (and probably buy) your other products at normal price. Increase your traffic in a easily and effective way.

The system gives you maximum control and flexibility on all aspects of the sale. You and / or whoever you want can be notified when a sale is made. You can define commission payments to one or more avatars on each sale. You can also get a list of sales and define if only the group can buy, customize the vendor appearance, change the remaining time or price at any time without restart, pause the countdown, etc. Read this guide to learn the other features of this product.

2. Get Started

The setup of this product is very easy, please follow these simple steps carefully:

1. Rezz the vendor at the place of your choice.
2. Edit the vendor (Press over it with the right button and choose EDIT from the menu).

3. If you want, you can change the configuration editing the "vx_config" notecard. See the Section 3 on this guide to learn more about configuring the device using the notecard.

4. Drag one or more products you want to sell to the "Contents" tab of the vendor..

5. Also you can drag a picture of your product to the "Contents" tab. That picture will appear on the screen automatically..

Con estos sencillos pasos el producto queda puesto a la venta. En este momento puede acabar de configurar las opciones mediante el menú (ver sección 4 de este manual para más información) o puede Resetearlo para recargar la configuración del notecard y empezar la cuenta atrás de nuevo.

With these few steps the products is set to sell. From here, you can change some options using the menu (see Section 4). You can also Reset the vendor for a fresh start and read the configuration notecard again.

3. Configuración usando la notecard

Inside the contents (inventory) of the vendor, you will find a notecard named "vx_config". Using the notecard, you can define all the initial setup. Some of these values may be changed in the future using the menu or editing this notecard again. Once you finish editing the options, save the notecard (CTRL + S on PC, CMD + S on Mac), click on the device, when the menu appears press "Reset" and confirm, the new values will be applied in a moment.

Lines beginning with // are considered comments and will be ignored. Below you can find an explanation of each option in the notecard:

Sale_Message = [message]

Define the message you want to send to the customer when he / she buy the product..

Managers = avatar1, avatar2, avatar3...

Put here the names of the avatars you want to bring access to the menu, separated by commas ",". Example: Redix Dollinger, Rubby Clip, biotxa Sirbu.

Require_Group = Yes | No

If this option is active (Yes), only the members of the same group of the object (wearing the tag) will be able to buy the product. If an avatar pays to the vendor and he/she is not wearing the group tag, the money will be refunded and of course, the product won't be delivered. Please remember you need to allow to get L\$ from your account to pay the refunds when you activate this option.

Price = [Numeric Value > 0]

The price of the product. Must be more than 0 and can be modified at any moment using the menu.

Days = [0-31]

Define the number of days the offer will be active. Must be between 0 and 31 and you will be able to modify it at any moment using the menu.

Hours = [0-24]

Define the number of hours the offer will be active (plus the days choosed before). Must be between 0 and 24 and you will be able to modify it at any moment using the menu.

Minutes = [0-59]

Define the number of minutes the offer will be active (plus the days and hours choosed before). Must be between 0 and 59 and you will be able to modify it at any moment using the menu.

Notify = Yes | No

|

If you choose Yes, the owner will be notified each time the vendor will sell the item.

Notify_Others = key1, key2, key3

The avatars here, also will be notified when a product will be sold. Here you DO NOT write the avatars names, you need to write its keys (UUIDs). If you don't know the key of an avatar you can go here: <http://www.w-hat.com/name2key> . Remember to separate the avatars names with a comma ",".

Texture_Loading = texture_UUID

Texture_Normal = texture_UUID

Texture_Group = texture_UUID

Texture_SoldOut = texture_UUID

Let you customize the appearance of the vendor (board texture). Specify one texture UUID for each case (or leave it blank for default textures). The cases are: Loading screen, normal countdown, group only mode and soldout (the soldout mode affects to the picture screen and NOT to the vendor background).

Commission = percentage, UUID

Let you the option to pay a commission to one or more avatars of your choice. Use one line for each avatar and follow this example:

Commission = 20, e3767ec9-a847-41d9-ad63-fdedca6d2927
Commission = 30, b7c0e9dd-a6ae-4ba7-b390-2266d608c81e

This example, pays to the first avatar a 20% of the sale amount and a 30% of the total amount to the second avatar, remaining for the owner the 50%. Please remember: If you define any commissions, you will be prompted to grant debit permissions (to obviously pay that commissions). See Section 7 of this guide to learn more about the commission system.

You can get the default configuration notecard here: [□](#)

4. Configuration using the menu

From the menu, you can change some configuration options. All the options from the menu, will be applied at the moment without resetting.

PAUSE / CONTINUE

Stop and continue with the countdown. When a countdown is paused, the customer CAN continue buying the product.

CLOCK

Allows you to modify the countdown in real time to increase or decrease it. To do that, use the values preceded by + and -. If time arrives to 0, the system enters in the "SoldOut" mode..

PRICE

Allows you to modify the price of the product in real time to increase or decrease it. To do that, use the values preceded by + and -. Price must be more than 0.

GROUP

If this option is active (Yes), only the members of the same group of the object (wearing the tag) will be able to buy the product. If an avatar pays to the vendor and he/she is not wearing the group tag, the money will be refunded and of course, the product won't be delivered. Please remember you need to allow to get L\$ from your account to pay the refunds when you activate this option.

SALES

Show a list of sales, including the buyer's name, price paid and date. This report will still available when the countdown ends.

END

Force the countdown to end. To start a new offer, simply Reset the device.

RESET

Restarts the vendor, clear the sales list and load all default values from the

notecard.

5. Managers

The managers are avatars who can access to the emnu and can configure and change everything. You can add your own managers from the configuration notecard.

Edit the vendor by clicking on the right mouse button and selecting "Edit". Go to the "Content" tab and double click on the notecard "vx_config".

Find the line beginning by "Managers = ". After the = sign, enter the names of the avatars separated by a comma ",". Be careful when writing the names must be exact, we recommend you copy & paste it from the chat window.

Save the notecard (CONTROL + S) and reset the device (Menu, Reset).

REMEMBER: you must reset the device to read the configuration notecard to activate the changes, but be careful, if you reset the device, all sales data will be lost and countdown will be restarted.

6. Notificar a otros usuarios de las ventas

If you want, you can define other avatars (employees, alts, partners) to be notified on each sale.

Edit the vendor by clicking on the right mouse button and selecting "Edit". Go to the "Content" tab and double click on the notecard "vx_config".

Find the line beginning by "Notify_Others = ". After the = sign, enter the keys (UUIDs) of the avatars separated by a comma ",".

Save the notecard (CONTROL + S) and reset the device (Menu, Reset).

The key (UUID) of an avatar is a unique identifier of the avatar. You can get the key of an avatar (knowing its anme) using the service at this URL:

<http://www.w-hat.com/name2key>

Is very important you inform to the people included in this list in according to the Second Life(tm) TOS.

REMEMBER: you must reset the device to read the configuration notecard to activate the changes, but be careful, if you reset the device, all sales data will be lost and countdown will be restarted.

7. Pay a commission over the sales

The system allow you to pay a commission of each sale to one or more avatars. To do that, follow the instructions bellow:

Edit the vendor by clicking on the right mouse button and selecting "Edit". Go to the "Content" tab and double click on the notecard "vx_config".

In the notecard, go to the end (if not exists a line beggining with commission =) and add lines with the following syntax (one per avatar you want to pay):

```
Commission = 20, e3767ec9-a847-41d9-ad63-fdedca6d2927  
Commission = 30, b7c0e9dd-a6ae-4ba7-b390-2266d608c81e
```

This example, pays to the first avatar a 20% of the sale amount and a 30% of the total amount to the second avatar, remaining for the owner the 50%. Please remember: If you define any commissions, you will be prompted to grant debit permissions (to obviously pay that commissions).

The key (UUID) of an avatar is a unique identificator of the avatar. You can get the key of an avatar (knowing its anme) using the service at this URL:

<http://www.w-hat.com/name2key>

8. Support and updates
