2. WHAT IS ACC FTJ HONOR BOARD?

This board is meant to work connected to an ACC Floating Tip Jar Terminal. The board does not work alone.

This board will display the picture of the terminal user who received the most tips for a certain period. The period(s) to display can be defined using the board menu.

The board will rotate between the different time periods you have decided to display.

The board includes many customization options like color, list of managers etc.

3. BOARD CONNECTION TO A TERMINAL

The board can only be used in the same sim than your FTJ Terminal. Make sure that the Terminal is already rezzed when you rez the board.

As soon as you rez the board it will scan the sim for terminals. It will display the number of terminals found. To connect the board, click on it.

If only one terminal was found it will connect automatically to this one.

If multiple boards are found on the sim, the board will list them in open chat with a number next to it. Then you will be prompted for the number of the terminal to connect to.

If you chose the wrong terminal you can repeat the process using the "@ ADMIN\CHANGE TERM" option in the menu.

4. MANAGERS

The owner can define as many managers as needed.

This can be done using the MANAGER menu in the @ ADMIN menu.

Managers have the right to change the terminal setup and customize it.

5. RANKING

The ranking of the users is based on the amount they have been tipped during the period concerned. This is tipped amount before any commission deduction.

There are six periods available for display:

- TODAY – Includes all tips received today (day is based on SL time)
- YESTERDAY – Includes all tips received yesterday (day is based on SL time)
- THIS WEEK - Includes all tips received this week (week is based on SL time and starts on Monday)
- LAST WEEK - Includes all tips received last week (week is based on SL time and starts on Monday)
- THIS MONTH - Includes all tips received this month (month is based on SL time and calendar month)
- LAST MONTH - Includes all tips received last month ((month is based on SL time and calendar month)

CAREFUL – The amount considered will start at the time the board has been rezzed and will not include past tips. For example, if you rez the board on Wednesday, the “THIS WEEK” counter will not consider the tips received Monday and Tuesday.

All users will be able to click on the board to get their position in each period like below:

[07:21] FTJ Honor Portrait 1.3: You are not listed in TODAY ranking
[07:21] FTJ Honor Portrait 1.3: You are not listed in YESTERDAY ranking
[07:21] FTJ Honor Portrait 1.3: You are LEADER in THIS WEEK ranking
[07:21] FTJ Honor Portrait 1.3: You are not listed in LAST WEEK ranking
[07:21] FTJ Honor Portrait 1.3: You are LEADER in THIS MONTH ranking
[07:21] FTJ Honor Portrait 1.3: You are not listed in LAST MONTH ranking

6. TERMINAL CUSTOMIZATION OPTIONS

The terminal includes multiple ways to customize it. Those options are only allowed to the terminal owner, not to managers.

TERMINAL COLOR

Using admin menu, the owner can change the terminal color from a given list of 10 colors: White, Black, Silver, Dark Grey, Blue, Lime, Yellow, Orange, Red and Marron.

TERMINAL LOGO

The terminal included the possibility to define your own logo. The logo is a square shape texture. To apply the logo, you need to copy the texture UUID and paste it in the window that will open from the admin menu (see below for detailed instructions).

The logo will be displayed when the board is turned off.

OVERTEXT

If overtext is on, a text will be displayed in the middle of the picture with period concerned and name of the person on the picture

For example:

*HONORED LAST WEEK
Agnes Chalet*

7. MENU DETAIL OPTIONS

Depending if you are a manager or normal user you will get different options in the menu.

If you are not a manager the terminal will list if you are ranked or not in the different period as a user.

Once you click on the terminal as a manager options will be:

DEVICE ON – Can be used to start and stop de device. When stopped the default logo or the logo you have defined will be displayed

TODAY – The picture of the user who received the highest tip value today so far will be part of the rotating display sequence

YESTERDAY – The picture of the user who received the highest tip value yesterday will be part of the rotating display sequence

THIS WEEK – The picture of the user who received the highest tip value in the current week so far will be part of the rotating display sequence

LAST WEEK – The picture of the user who received the highest tip value last week will be part of the rotating display sequence

THIS MON – The picture of the user who received the highest tip value in the current month so far will be part of the rotating display sequence

LAST MON – The picture of the user who received the highest tip value last month will be part of the rotating display sequence

ALL ACTIVE – Activates all the previous displays

POSITION – Will give users their rank in each of the periods

@ ADMIN – Will call the admin menu (only available to managers)

CANCEL – Will close the menu

@ ADMIN\+MANAGER - Will allow you to paste a person UUID and make this person a manager

@ ADMIN\‐MANAGER - Will allow you to paste a person UUID and remove this person as a manager

@ ADMIN\LIST MANAGE - Will list the current managers including their UUID

@ ADMIN\OVERTEXT - Will turn on and off the overtext that shows the name of the person on the picture

@ ADMIN\RESET REPORT - Will reset all counter and restart statistics from this moment on

@ ADMIN\FREQUENCY - Will allow you in a next menu to choose the frequency of the rotating display sequence. Available frequencies are 5, 10, 20, or 30 seconds, 1, 2, 5, 10, 15 or 30 minutes

@ ADMIN\TERM COLOR - Will allow you to choose the board frame color from a list. Available colors are white, black, silver, drak grey, blue, lime, yellow, orange, red or maroon.

@ ADMIN\TERM LOGO - Will allow you to paste the UUID of a texture to define it as board logo

@ ADMIN\RESET DEVICE - Will totally reset the device scripts

@ ADMIN\CHANGE TERM - Will disconnect the board from the current terminal and allow you to choose another one

@ ADMIN\@ HOME - Will call back the @ HOME menu

@ ADMIN\CANCEL - Will close the menu
