CrocRENT – Basic Rental System 1.0

Manual settings powered by Notecard:

- set the rental weekly cost
- choose the prim allowance
- set the position of the rental box when rented
- set the texture of the box before and after being rented

Automated settings by the Rental System:

- Unlimited copies
- Only one script in each rental, LOW MEMORY LOW LAG.
- Hovertext show info before rent it
- Box move and change texture when rented
- Give refunds for incorrect amount
- Sends IM to you when someone rents
- Sends IM to tenant when close to end of agreement
- Gives 10% discount if renter chooses to pay 4 weeks in one payment
- Gives INFO notecard to potential tenants when touched

The Croc Technologies rental bix is low lag and simple to use.

- ➢ Rez the box and place it where you want.
- ➢ Give permission to the pop up requesting access to Linden balance. This gives you 100% of the rental payments.
- ➢ Open the box and open the settings notecard.
- ➢ Adjust the settings to your liking and then click the box to reset and activate your settings.

You can drop in any texture and name it accordingly to show your own textures before and after the box is rented.
