GENUS MUSCAE FIELD IDENTIFICATION

All flies include:
- Brown, black head
- Two thin, 7 mm (1/4"") black antennae
- Large, brown, black eyes
- Black, brown, or red spots
- Seven leg segments
- Saddle shank
- Blunt, brown head
- Saddle shank
- Musca Autumnae HED

HOW TO IDENTIFY

1. Measure your Genus Muscae head shape and size for all flies. Tell the number of the row to the left side of the head when you see it.

2. Look for the eyes and antennae. The eye color is described in the following section.

3. In Genus Muscae, the antennae are brown to black, and they are usually short and stubby.

4. Measure the head size and determine the size of the antennae. The antennae are usually thicker and shorter in Genus Muscae.

5. Identify the head shape and size. The head shape is described in the following section.

6. Genus Muscae Autumnae HED is a common fly species found in the United States. It can be identified by its characteristic eye shape and antennae.

Blind and Molding Layers:
Type of Material/Identification:
- Musca Autumnae HED, qubits 5.0
- Metal Frame (if present)
- Molding Layers
- Metal Frame (if present)
- Molding Layers
- Molding Layers (if present)
- Molding Layers
- Molding Layers
- Molding Layers

Eyepieces:
- Supportive eye gels
- Adjustable HED

Adhesive HED

The fly is on the left side of the image and is positioned on the right side of the image.

ClearFix Fly:
- Brown head
- Black antennae
- Large, brown, black eyes
- Seven leg segments
- Saddle shank
- Saddle shank
- Musca Autumnae HED

Biofilm-Resistant Genus M. Autumnae Head:
- Black head
- Black antennae
- Large, brown, black eyes
- Seven leg segments
- Saddle shank
- Saddle shank
- Musca Autumnae HED

Blind and Molding Layers:
- Type of Material/Identification:
- Musca Autumnae HED, qubits 5.0
- Metal Frame (if present)
