

Adding RESIZE to your CORE MENU.

As a part of your awesome menu. No more duplicating scripts in every single link child.

Life time updates only 99L.

RESIZE API – READY

HOW DOES RESIZER-API Works?

FEATURES

✓No more redundant bundle scripts with whole bunch of unwanted functions like the scripts from Hez/HaxWOX/HEX/GKSCRIPT where those functions cramble into one big messy menu.

✓Unlimited link prims resizeing.

✓Restore function will save you from the wrong resizing choice like the life guard.

TM

- ☑ Each prim will be resized gradually with safty protection.
- ☑ No duplicating scripts around the whole link set that causes sim lag or be banned (extreme scenario).
- ☑ Works a part of your CORE MENU API that directly hookup to the main menu.
- ☑ Fast instant performance where all scripting occupy the newest scripting method SetlinkprimitiveparasFAST!!! and it get you like rocket speed.
- ☑ All standard resizing functions (+.05, +.10, +.25, -.05, -.10, -.25, RESTORE, MAXIMUM SIZE, AND MINMUM SIZE).
- ☑ Can effectively limiting your customer's choice by drag in and out of the script your awesome builds.

Awesome simplicity functions with awesome price!

* One set price copy + trans is only 90L for yout portal creations!

 Life time upgrades and customer supports.

Instructions and †License Agreement is attached or can be downloaded via here.

DISCLAIMER

Please read the text below really carefully.

This script solely does not run properly to achieve your goal and it does require the CORE script to run within a proper guideline. The CORE MENU API is now available on SLX and Metalife.com. Scripts will break or not working effectively from the bullets ★ described. You are agreed to receive no warranty and no refund whatsoever when you have met those situation described from bullets ★ in the Troubleshootings and you are also agreed to use it on your own risk without proper guideline.

PROCEDURE & INSTRUCTIONS

HOW TO IMPLIMENT THIS SCRIPT

First you need to have CORE MENU API from HKM Gears and have it ready.

Then you need to have this script added into your build first. (All your builds should be final. It must be a link set with the modify right and ready to be sold except it needs to be scripted.) Wait

TM

about one second, then add the CORE MENU API into the same build same prim. Everything should be all set. If the menu does not show up after you have click on it, please see the bullets below.

‡SOLUTION / TROUBLESHOOTINGS

- ★ Sim Lag or Crash - teleport to another place and try again. Sim lag environment will cause damage to the operation of script and it will also cause the sim server to slowly responding to prim content updates.
- ★ Not running - double click on all scripts one by one. In each please be sure that is checked on "running" and pressed reset button promptly from the screen signal. Reminding the CORE MENU API as the last one to be checked and pressed reset. All script resets will remove previous saved data and start over again.
- ★ Disorder - simply remove the script and drag the scripts into the prim and try again. Once you have checked all the scripts on "running" and reset button and be sure that CORE MENU API is the last script to be done.
- ★ No script area - your customer may come back and ask you why it does not work. That is the reason why. You need to explain to them that no features will be shown within the no-script zone. Also remember when you are building, remind yourself to do the scripting works in a scripting available zone.
- ★ Changing server supporting machine language on Linden Script – Linden Lab might subject to change the Linden Script supporting with or without prior public announcement. Thus, the script might break and cause problems to the end user. For the latest detail please go on LSL wiki and see the latest updates on each built-in function in the library. New function will show (new) and the function no longer working will be crossed out or (deplicated).

TM

†AGREEMENT & TERMS

YOU ARE BOUND BY THESE AGREEMENT AND TERMS WHEN YOU USE HKM GEARS SCRIPT EXCEPT THE LISTING FROM ②.

② Exception scripts list: NONE

✕ This agreement is subjected to any HKM Gears scripts with trans and copy permission (AKA PRO script) when it transferred to the next owner.

✕ The script is intent for building use.

✕ All your builds with PRO script alone MUST set permission on either NO TRANS or NO COPY before transfer to the next owner! Redistribution of this script for FREE is not allowed.

✕ No unauthorized reselling this PRO script ALONE on SLX or in-world vendings. Violation will be prosecuted.

✕ Reselling application is available in-world or contact the author Heskemo Oyen directly.

✕ Script is EITHER COPY OR TRANSFER.

Included is the script so that you can include it in your own builds for sale! All script included are Copyright HKM. I do, however want all of my customers to make great things and sell them with my book scripts build into them. I wish you all the best with building using my scripts.

Note card contact is available

Join the group to receive the latest releases and free products from beta testings.

Happy building and creating!

Sincerely,

HKM Gears
