

*****SELO CHANDELIERS SET 1 v1.0 NOTECARD*****

Hello and thank you for your interest in my SELO CHANDELIER SETS.

This set has 18 different chandeliers. You can rez the rez box on the floor... click the box... select Rez from the menu. 18 chandeliers will rez on 2 different stands.

They are linked. You can unlink them as in the following:

-Right click on the set... Edit...

-Go to Tools menu on SL Viewer... Unlink. Now 18 chandeliers and the 2 stands are unlinked and you can use them as you like or take them into your inventory one by one to use later.

When you click the chandelier, you will see a menu with On/Off and Next/Previous options. You can change the chandeliers by clicking Next or Previous.

Each one of the chandeliers in the set has the same 18 chandelier textures.

All chandeliers are COPY/MOD so you can rez as many copies as you like and resize them up to 10 meters.

You can resize them without messing with the the proportions as in the following:

-Right click on a chandelier... Edit...

-Press Ctrl+Shift at the same time and you will see tiny white cubes in the corners of the chandelier. You can resize it by dragging one of those cubes and you will maintain the proportions.

Please feel free to IM me if you need any help with this set.
