VIRTUAL FISHING EVENTS HUD

WHAT I DO:

I show the current active Virtual Fishing events, "x2" though "x10", from the Virtual Fishing website*.

I also show any nearby "x1" buoys when possible**.

I show the following information for the listed buoys:
1. the distance to buoys in this Region
2. the Region name
3. the "x" level
4. the current balance
5. an estimate of how long until the buoy is out of funds

Buoys that are not being fished show ∞ for the estimated time.
Nearby buoys are colored green if within range (20m) or red if out of range.

I play a 'trumpet fanfare' when new events appear and a 'squeak toy' sound when buoys downgrade to "x1" or run out of funds.

WHAT YOU CAN DO:
Click on F to immediately fetch the latest data.

Click on P to send the list to Nearby Chat including links to the buoy locations.

    VF Events HUD: Available Buoys: 2
    • Pacific Ocean/100/100/24 x2 $654 2.1h
    • Pacific Ocean/200/200/24 x2 $790 4.2h
    • Atlantic Ocean/300/300/24 x1 $292 ∞

Click on the fish for a short message of encouragement in Nearby Chat.

ADVANCED - SOUNDS:
You can remove the 'trumpet fanfare' and 'squeak toy' sounds from the HUD if you prefer silence.

ADVANCED - IGNORED
There is a notecard in the HUD called "VF Ignored". I won't show any Regions or Buoys I find in this notecard.

This line hides one buoy:

    Arctic Ocean/128/128/22

This line hides all the buoys in the Region:

    Arctic Ocean
