

# KittyCatS!

## Basic Information-Getting Started

### Kitty Scoop of the day

Your kitties need food to thrive and grow. They LOVE their food!

- 1 bowl of food will feed your cat for 4 weeks.
- If breeding is turned off, it will feed your cat for 8 weeks.
- The food bowl disappears when it is empty.
- Food bowls are 2 prims.
- By default, food is set to "sim wide" and "my cats" which feeds all cats you own on the sim no matter where they are.

• You can purchase food in our store here: <http://maps.secondlife.com/secondlife/KittyCatS/138/8/26>

### Vita-Milk

Vita-Milk is an optional product. Your cats do not need it! It is only used to boost happiness for breeding cats. Breeding cats gain love 30% faster when drinking milk.

1 bowl feeds 1 breeding cat for 4 weeks.

- Non-breeding cats and kittens (cats age 0-6 days) will not drink milk.
- The 1-bowl portion comes ready to use. The 5, 10, & 20 bowls are boxed and need unpacking.
- If you have a MeowMat with Auto-Fill enabled, your milk purchases will go directly to your MeowMat.
- Vita-Milk gives a boost to cats which raises Happiness and increases Love gain by 30%.

Can be configured in a various way to suit different needs:

- **My Cats** - will only feed your cats.
- **Group** - allows your cats and cats set to the same group to consume the bowls.
- **Any** - will feed any cats, regardless of owner or group.
- **Sim** - will feed all chosen cats within the same sim.
- **Parcel** - will feed all chosen cats within the same parcel
- **Range** - will only feed chosen cats whose home point is within range of the food.
- **To Supply** - will send your milk bowl to your MeowMat.

### MeowMat

The MeowMat is an auto-feed system that does the job of placing food out for you. Add bowls to the MeowMat automatically as you purchase them, or manually.

Food/milk must be bought separately. If you own a MeowMat, your food/milk purchases will go to directly to the mat by default due to the AutoFill feature.

You can disable AutoFill, and send your food and milk to the mat by hand using the "To Supply" button that will appear in the bowl's menu.

The "To Supply" button only appears on food and milk bowls if you have a MeowMat rezzed!

### Perma-Pet

These products turn your cat into a pet that doesn't need eat, won't ever get sick, and will not breed.

**Perma-Pet™** is for cats that are 7-119 days.

**Perma-Pet™ 120** is for cats that are 120 days or older.

Both **Perma-Pet™** products can be used on sick cats and will cure them instantly!

**Perma-Pet™** can also be given to No-Trans cats and in addition to the above, they will also become transferable!
