What is the S Stream?

- The S Stream is an essential package for those who want something that “just works”. Meaning there are no unnecessary bells and whistles, like dashboards or custom URLs. Only what you need to start broadcasting music live to Second Life or Real Life, hassle free and for a very affordable price.
- By using the latest version of SHOUTcast, all our streams have an embedded player on it’s status page, making it possible for anyone with the streams URL to listen to it Live on any Internet enabled device (figure 1)
