📜 Help Document: Green Tech - VOLTIX-8 DRONE

✨   Created & Released: September 29, 2025

Welcome, Pilot! You now own the first intelligent drone in Second Life. This quick guide gets you airborne in minutes and keeps you safe while exploring the skies.

── ◆ »» 1. Quick Start ««──
─────────────────────────

◆ »» 1. Rez the DronePad (optional) – Click it to cycle textures and pick your favorite landing zone.

◆ »» 2. Rez the Drone:

◆ »» 3. Touch left or right doors (optional). Trunk door also has an opening and closing system.

• Right-click the VOLTIX-8 and choose 🚀 Fly.

• Select 🛸 Pilot option.

🛸 Pilot menu will appear

◆ »» 4. Engine Control:

Choose ▶ START – to ignite the electric engines

Make sure all doors are CLOSED, otherwise Flight Safety System will NOT allow the engines to start

🚫 STOP – full shutdown.

💡 Jump or fall off? The drone auto-lands, powers down, and prints its location in local chat.

━━━ ◆ »» 2. Mastering Flight
««━━

• Normal Control: Arrow Keys steer and tilt (⬆️ ⬅️ ➡️ ⬇️ .). 🔼 PageUp 🔽 PageDown

• Press and hold the Shift key, then press the left or right arrow keys (⬅️ ➡️) to move sideways.

• Autopilot 🤖 – locks current speed & altitude. Steer with ← → keys; any ↑ ↓ / PageUp / PageDown cancels autopilot instantly.

• Region Crossings: Cameras and menus recalibrate automatically. Extreme lag can still bite — keep graphics moderate for best results.

━━━ ◆ »» 3. Pilot Menu
Reference ««━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━

▶ START / 🚫 STOP — Power.

🎥 CamMenu — Opens camera selector (see section 4).

🤖 Autopilot — Engage current speed hold.

💮 Voyage — GT Voyage™ badges viewer, statics, Achievements

⚙️ Settings — Opens settings submenu.

━━━ ◆ »» 4. Camera Modes &
Perspectives ««━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━━

Our intuitive camera system is designed for a seamless flight experience, offering dynamic perspectives to match your style.

Access: Navigate the main menu via 🛸 Pilot → 🎥 CamMenu.

The system defaults to ActionView upon sitting, ensuring you're instantly ready for takeoff.

📷 ActionView

A balanced and responsive chase camera, your go-to for standard flight and situational awareness.

👁 EpicView

A wider, more dramatic cinematic view perfect for capturing heroic fly-bys and scenic moments.

🚁 DroneView

A top-down tactical perspective. This view is ideal for precision landings and navigating tight spaces with ease.

💃 Selfie

A classic front-facing camera to capture your avatar's flight adventures.

All camera modes are designed to be smooth and responsive, dynamically following the vehicle's every move. Experiment to find your favorite view!

———————————————————————————————————— ◆ »» 4.5 💮 Voyage -
🏆 GT Voyage™ (Badges + Stats) ««————————————————————————————————
————————

What it is — A lightweight progression that logs your rides, updates lifetime stats, and unlocks badges (stars). Progress is tied to your avatar and persists across copies/redeliveries.

How to use

🔴 StartVoyage (Captain) — begin tracking this session (🔴 REC indicator appears).

Ride normally — cameras/poses don't interrupt logging.

■ StopVoyage — ends and auto-saves stats/badges (view in 🏆 Achievements).

🔄 Sync&Stats (optional) — use only after rezzing a new copy, redelivery, or relog to refresh stars and print a quick summary.

The Drone track (lifetime + session)

• Trips • Distance • Duration • Top Speed • Avg Moving • Regions

Badge examples (earned stars = ⭐)

• ⭐ First Voyage

• ⭐ ⭐ Nomad 10   ⭐ ⭐ ⭐ Nomad 50   ⭐ ⭐ ⭐ ⭐ Nomad 100   ⭐ ⭐ ⭐ ⭐ ⭐ Nomad 500

• ⭐ Long Haul (30m)   ⭐ ⭐ Endurance (60m)   ⭐ ⭐ ⭐ Endurance (120m)

🏆 Achievements — GT Voyage™ badges viewer

🔄 Sync&Stats — Resync & quick summary (optional)

🔴 StartVoyage — Begin Voyage tracking

■ StopVoyage — Stop & save tracking

─── ◆ »» 5. Settings
Sub-Menu ««━━━

🆘 Help — Get this manual.

🖥️ [HUD] — Receive and wear the flight HUD (attaches to bottom).

📡 Beacon — Prints a live status report to local chat.

☀️ LandingLights — Toggle bright approach lights.

🔦 Searchlight — Powerful forward spotlight.

🔒 Access — Security & permissions (see section 7).

🚫 BanLineOFF — Ban-Line Scanner OFF (default).

🚧 BanLineWarn — Scanner ON (Warn Only).

🤖 BanLineAuto — Scanner ON (Auto-Evade) ⋯→ For experienced pilots only!

── ◆ »» 6. Ban-Line Scanner
««──

»» Mode ««	»» What it does ««
🚫 OFF	Scanner disabled – no boundary checks.
🚧 WARN	Live radar in a 40 ° fan ahead of you. Chat alert shows icon + threat level, direction (e.g. 20° R), ~distance, and parcel name / owner so you can steer clear.
🤖 AUTO-EVADE	Same alerts plus a short, hands-free dodge: VOLTIX-8 yaws away, flies ~4 m, then gives control back. If you ever get stuck inside a ban line, just tap this button – it will pop you out.

Smart details

• Ignores land owned by you or your group.

• Scans again only after you move 12 m or 8 s.

• ACCESS DENIED = ⛔ DANGER | GROUP ONLY = ⚠️ WARN.

── ◆ »» 7. Security & Access Control ««──────────────────────────

Take full command of your vehicle's security through a simple yet powerful interface.

Access: 🛸 Pilot → ⚙️ Settings → 🔒 Access

Set Mode

- 👑 Owner Only — only you can operate

- 👥 Group — members of the set group

- 📝 Access List — only approved users

- 🌍 Everyone — public

Manage Access List

- ➕ Add User — enter avatar Key (UUID)

- ➖ Remove User — by Key

- 📄 View List — prints authorized users

- ⚠️ Clear List — empties the list

Find a Key (UUID)

Open the avatar's profile (viewer) and copy their Key/UUID.

(e.g., 7c86fa86-0dc0-425e-b547-84fd0e4bab17)

── ◆ »» 7.5 SKINS — Live Texture Presets ««──────────────────────

GreenTech SKINS turns texture swaps into a fast, game-style preset system. All skins apply instantly in both Legacy and PBR (materials) so they look right in every viewer.

Where to open

• On the ground (not seated): Left-click the drone → SKINS opens.

• In flight: Main menu → 🧬 SKINS.

Categories

• Seats — cushions, headrests, center console.

• Cockpit — inner shells, doors (interior faces), trims.

• Exterior — hull paints and accents.

How it works

• Pick a category (Seats / Cockpit / Exterior).

• Tap a preset to apply it instantly.

• Use Next ▶ / ◀ Prev to browse when there are many options.

• 💾 Save Profile stores your favorite combo for quick return later.

• 🧽 Reset restores the factory skin.

Tip: You can freely mix & match (e.g., Seats A + Cockpit B + Exterior C). Available presets depend on the edition you purchased.

Who can change skins (permissions)

• In the SKINS home screen tap 🔐 Access and choose:

• 👑 Owner Only – only you can change.

• 👥 Group – anyone in the drone's set group.

• 🌍 Everyone – public (fun for events).

─── ◆ »» 8. Flight HUD ««─
──

Flight HUD

After clicking 🖥 [HUD], wear it from your inventory to view:

• Pitch / Roll Indicator

• Altitude & Vertical Speed

• Horizontal Velocity

• Compass Heading

• GPS & Live Region Map: Your vehicle's real-time position and heading on a top-down map of the current region.

─── ◆ »» 9. Beacon Report
««──

Click 📡 Beacon any time for a chat report like:

╔═ 📡 GreenTech Beacon Report 📡 ═╗

ID: GC-07F | Pilot: Your Name | 13:09 SLT

... (status, location, SLurl) ...

Great for logging flights or finding the drone after a crash.

─── ◆ »» 10. Lights & Doors
««──

• ☀ LandingLights – Approach strobes; only work while engines are off or idle or on.

- 🔦 Searchlight – Adjustable spotlight for night missions.

- 🚪 Doors – Open only while on ground/idle; safety first.

── ◆ »» 11. Emergency & Safety ««────────────────────────────────

• Stand-up, fall, or crash? VOLTIX-8 performs an emergency landing on the nearest surface and shuts down.

• Region crossing lag eject? The drone whispers its coordinates in chat so you can teleport back.

── ◆ »» 11.5 Pro-Tips & Manual Overrides ««────────────────────────────

Sometimes, extreme lag can cause issues. Your vehicle is equipped with manual chat commands for emergency recovery.

🆘 Lost Your Menu?

If your menu disappears and won't return, type this in local chat to force it to reappear:

/99 menu

📍 Lost Your Vehicle?

If you get separated from your vehicle and need its location, type this in local chat:

/99 sos or /99 locate

The vehicle will instantly send you an IM with its exact position and SLurl.

Note: You must be within 96 meters for the vehicle to "hear" chat commands.

── ◆ »» 12. DronePad Texture Swap ««────────────────────────────

Touch the included DronePad to scroll through a curated library of pad textures and personalize your base.
