

User Guide

Built for smooth cruising, photo-ready cameras, and our GT Voyage™ progression (badges + trip stats).
Enjoy the ride! 🌊

»» 1) Quick Start ««

- Rez the boat on water.
- Sit → the main menu pops up.
- 🚢 Captain → ▶ START to power on; 🚫 STOP to shut down.

»» 2) Menus Map ««

- 🚢 Captain — Core controls, cameras, Voyage, tools.

»» 3) 🚢 Captain (buttons) ««

POSE 🌟 Pilot

▶ START — Start engine

🚫 STOP — Stop engine

📷 CamMenu — OmniView camera menu

🏆 Achievements — GT Voyage™ badges viewer

🔄 Sync&Stats — Resync & quick summary (optional)

● StartVoyage — Begin Voyage tracking

■ StopVoyage — Stop & save tracking

⚙️ Settings — Tools & options

◆ »» 4) 📹 OmniView — CamMenu ««

- 👁 Standard — default driving view (recommended)
- 🦅 EagleEye — high top-down situational view
- 📱 Selfie — head/torso framing for portraits
- 🌊 Underwater — low waterline, dramatic hull shots
- 📺 Deckside — 3/4 side (catalog look)
- 🌀 Wake — low stern chase, close to the wake
- 🔄 Reset — restore default camera

◆ »» 5) 🏴‍☠️ 🚩 Flag System (Countries & Custom) ««

Change the stern flag to your country or any custom logo.

How to open

- Path: 🚢 Captain → ⚙ Settings → 🚩 Flag
- Or simply left-click the flag prim.

Countries

- Browse 🌐 Countries, pick a flag, it applies instantly.
- Flags use textures in the boat inventory (e.g., “Flag – Brazil”). If missing, a built-in UUID may be used.

Custom UUID

- Choose 🌀 Custom, paste your texture UUID and Submit.
- Tip: drop your flag textures into the boat inventory for easy reuse.

Access Control for Flags

- 🗝 Inside the Flag UI: choose who can change flags:
 - 👑 Owner Only – 👥 Group – 🌐 Everyone

Tech notes (for advanced users)

- The system targets the prim named “GT_Flag” and applies the texture on faces 2 (+90°) and 4 (−90°) for mirrored sides.
- Default fallback texture = GreenTech logo.

Troubleshooting (flags)

- “Texture not found”: drop the texture into the boat inventory or use a valid UUID.
- Group mode requires the boat set to the intended group.
- If you replaced or renamed the flag prim, restore name GT_Flag.

♦ »» 5) 🏆 GT Voyage™ (Badges + Stats) ««

What it is — A lightweight progression that logs your rides, updates lifetime stats, and unlocks badges (stars). Progress is tied to your avatar and persists across copies/redeliveries.

How to use

● StartVoyage (Captain) — begin tracking this session (● REC indicator appears).

Ride normally — cameras/poses don’t interrupt logging.

■ StopVoyage — ends and auto-saves stats/badges (view in 🏆 Achievements).

🔄 Sync&Stats (optional) — use only after rezzing a new copy, redelivery, or relog to refresh stars and print a quick summary.

The boat Rivetta 34 track (lifetime + session)

• Trips • Distance • Duration • Top Speed • Avg Moving • Regions

Badge examples (earned stars = ★)

- ★ First Voyage
- ★ ★ Nomad 10 ★ ★ ★ Nomad 50 ★ ★ ★ ★ Nomad 100 ★ ★ ★ ★ ★ Nomad 500
- ★ Long Haul (30m) ★ ★ Endurance (60m) ★ ★ ★ Endurance (120m)

Units

- HUD speed readout = km/h (display).
- “ Captain →  Voyage →  Speed Now” reports knots (kn).

(You can safely mix both—numbers won’t “fight” each other.)

◆ »» 6) Voyage (submenu) ««

-  Trip Stats — current & lifetime summary (kn, km, time)
-  Depth Here — local water depth (m)
-  Heading — current compass bearing
-  Beacon — locator beacon utility
-  Speed Now — current speed (kn)
-  Wind — local wind info
-  Where — region / coordinates
-  FromStart — distance from trip start

◆ »» 7) Settings (submenu) ««

-  Horn — toot the horn
 -  NavLights — navigation lights on/off
 -  Rocking — idle water rocking on/off
 -  InfoDisplay — floating speed/gear text on/off
 -  Access — access control (see below)
 -  Flag — country/custom flag manager
 -  Help — redeliver this manual
 -  [HUD] — redeliver the HUD
-

◆ »» 8) 🗝️ Security & Access Control ««

Path: ⚓ Captain → ⚙️ Settings → 🗝️ Access

Set Mode

- 👑 Owner Only — only you can operate
- 👥 Group — members of the set group
- 📄 Access List — only approved users
- 🌐 Everyone — public

Manage Access List

- ➕ Add User — enter avatar Key (UUID)
- — Remove User — by Key
- 📄 View List — prints authorized users
- ⚠️ Clear List — empties the list

Find a Key (UUID)

Open the avatar's profile (viewer) and copy their Key/UUID.

◆ »» 9) 🖥️ HUD — quick legend ««

- SPD — speed (KTS) | GEAR — current gear (shows TURBO at max)
- Center map — compass grid; the boat icon = your position
- Right-side buttons — menu & camera shortcuts (model-specific)

◆ »» 10) 🌊 DuoRide & 🌊 AquaFlow ««

- DuoRide — two-person PG riding (unisex), supports [SWAP] and [ADJUST]
- AquaFlow — swim / float / dive poses (unisex), perfect for water RP & photos

♦ »» 11) Troubleshooting ««

- Pose stuck? Stand, sit again, then Ctrl+S.
- Camera odd? 📷 CamMenu → 🔄 Reset.
- Missing HUD? ⚙️ Settings → 🖥️ [HUD].
- Region crossing hiccup? Wait a moment; try 🛑 STOP / ▶ START.
- Lights/text not updating? Toggle 🚦 NavLights / 📄 InfoDisplay off/on.
- Rocking during ride? The boat auto-pauses rocking when engine physics is on; toggle ⚓ Rocking when idling.
