# RADIO INSTRUCTIONS

1) Rez the radio
2) Wait for stations being loaded (check local chat)
3) Ready! 🤩

TURN ON/OFF THE RADIO

The radio has no "on/off" commands: just toggle the Parcel Audio Stream, usually on the top right of your viewer (♫ music note symbol)*

➤ ON/Off command is missing to save more buttons on Menu page.

EDIT STATIONS NOTECARD

Right click the radio (Edit Mode), go to **Content** Tab, open the **"Stations" notecard**.
Add, delete or change stations. For example, add the line below:
J-Pop;http://jpop.lightmanstreams.com:902   [Station name;URL]
Save "Stations" notecard; wait for loading, done!

➤ Operating on notecard may require some artisanal work, but allows to avoid more scripts.
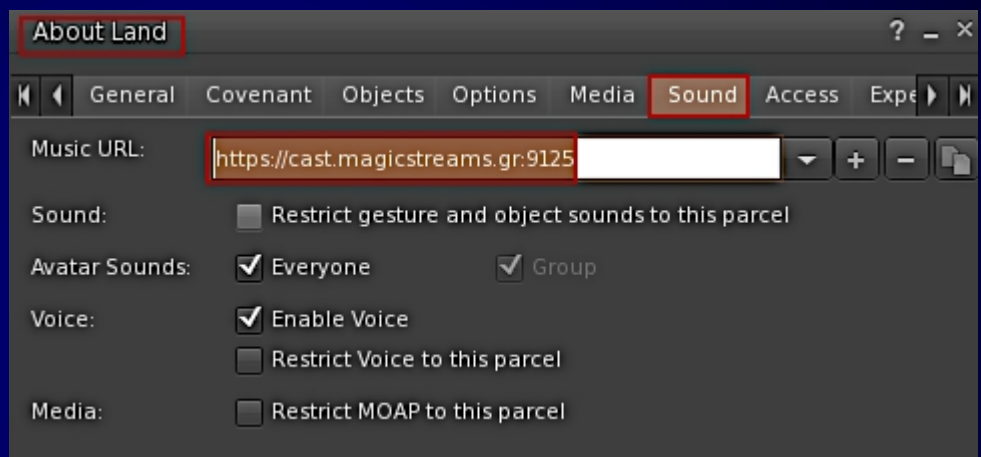

PREREQUISITES:

- You have to **own the land**.
- You shall be able to change stream in your place, by "**Land window">Sound Tab**.
If you can't edit the "Music URL" no radio in SL will do it!
There are also relays using Media feature, but they only work on your side, nor for everyone, neither synced like streaming sound.

➤ LISetParcelMusicURL is SL function to change music in your parcel.

If the land is **owned by a group,** you have to Deed the radio to. Instructions are in the Notecard inside a Radio.
Check if you can deed objects on your "**Group Profile**", under **"Abilities">"Object Management"** Folder and if deeding is allowed in that sim ("**About Land">"General**"). If you – or your land - don't have that power, ask to the Group Owner if you may be allowed to deed.
After the item is deeded, you won't be able to edit, move it or access its contents (scripts and configuration notecards).

CUSTOMIZED URL: It's named **"your Url"**. Click that button, fill the box in the menu window with your URL, save. Radio will warn about some, but not all, usual **mistakes** in compiling URLs.

This feature is useful to stream live music and djing.

WARNINGS

- **CUSTOMER SERVICE** is absolutely not provided for Radios sold/gifted by other Residents, *such as Crojerr, MMACradio.net, X-Radio aka The Anti-Establishment, Your Store.*

- If a **STATION QUITS WORKING**, check it later, servers may temporarily be down, either shut for some country or reached max. number of listeners at the moment.
  If an URL is still off after some time, it may be dead, so you can delete that station.

- **NO AUTOMATIC UPDATEꜱ**:
to $ave our money and **your privacy**, no door is open to any server! - except, of course, the streaming music ones *(that's why Viewers may have a media filter**).*

- **STATIONS LIST** is usually updated every month, so you may want a <mark>redelivery from MP</mark>.

- **AUTOMATIC REDELIVERY:** you may have it on Marketplace, by clicking "My Marketplace" at the top of the page, then "my Account". Choose "Order History" in the column on the left. There you can search either a product name or the merchant/store.

- **NO MUSICAL GENRE DIVISION:** tho similar stations are grouped on menu, the "genre" feature would require more notecards, but only one is used (Stations) to make the Radio more efficient.

- **FEW SIMPLE FEATURES** to have music stream working **quickly**!

- **1 SCRIPT 1** is in the Radio! We want the streamer as light and workie as possible! Only Steampunx and Sci-Fi models have a second, simple script to animate few textures.

- **11 MODELS AVAILABLE**: Dollarbie, Antique, Vintage, Internet, Boom, Steampunx, Sci-Fi, plus 4 seasonal ones: Christmas, Halloween, Love & Celtic Radio. All items are **Mesh & Full Perm**.

- **CUSTOMER SERVICE** is provided within 24h, preferably by IM, which are read offline too.
You may contact either Implacabilis or Michael Bakunin, also for an <mark>inworld redelivery.</mark>
Don't worry if you bought a Radio in world: transactions are tracked by LL, so your name is enough to know if you purchased a streamer in our shops.

Notes for *Firestorm Viewer*

* To show **Media Controls**, open Prefs (ctrl+P)>User Interface>Top Bars, flag "Show media controls in top bar".

To hide song title in local chat, open Prefs>Music tab, flag "Off" below "Show stream title notifications". Ofc, it will only work on your side.

** *About Media filter, you may read* this page by Inara Pey

A dollarbie made just because Radio means Music!
