

SLINDER COIN

User Manual

Overview

The Slinder Coin is a fully automated payout system for Second Life. It rewards visitors for staying at your location by automatically paying them Linden Dollars after a set wait time. Perfect for clubs, shops, hangouts, or anywhere you want to increase traffic and visitor retention.

Quick Start Guide

1. Rez the coin at your desired location
2. Click 'Grant' when asked for debit permission
3. Right-click the coin and select 'Pay' to add balance
4. Your coin is now ready for visitors!

How It Works

For Visitors:

1. Touch the coin to start
2. Answer the anti-bot security question
3. Stay within 10 meters of the coin
4. Wait for the timer to complete
5. Receive your Linden Dollar reward automatically!

For Owners:

Touch the coin to open the Owner Menu. From here you can adjust all settings, withdraw funds, and manage cooldowns.

Owner Menu Options

Button	Function
Set Payout	Set the L\$ amount users receive
Set Wait	Set how long users must wait (in minutes)
Set Cooldown	Set time before same user can use again (in minutes)
Withdraw	Withdraw L\$ from the coin balance
Clear CD	Clear all user cooldowns

Display Information

The floating text above the coin shows real-time information:

- Balance: Current L\$ available for payouts
- Payout: Amount each user receives
- Wait: Time users must wait
- Cooldown: Time before same user can use again
- Status: Available, Occupied, or Empty

Key Features

Anti-Bot Protection

Every user must answer a random security question before starting their wait time. This prevents automated bots from farming your coin. Users have 3 minutes to answer.

Persistent Data

All settings and balance are stored persistently. Your coin survives sim restarts, script resets, and region crashes without losing data.

Slinder.net Integration

Your coin automatically registers on slinder.net/coins where visitors can find all active Slinder Coin locations across Second Life.

Default Settings

Setting	Default Value
Payout	10 L\$
Wait Time	30 minutes

Cooldown	30 minutes
Distance	10 meters
Anti-Bot Timeout	3 minutes

Important Notes

- The coin pays from its internal balance, not from your L\$ account
- Keep the balance filled to avoid 'Empty' status
- Debit permission is required for payouts to work
- Users must stay within 10 meters during the wait time
- If a user leaves or logs out, their session is cancelled

Troubleshooting

Coin shows 'EMPTY'

Add more L\$ to the coin by right-clicking and selecting 'Pay'.

Users can't use the coin

Check if they are on cooldown, or if someone else is currently using it.

Coin not paying out

Make sure you granted debit permission when the coin was first rezzed. If needed, reset the script.
