Break Language Barriers in Second Life

SmartTranslate is a wearable HUD that provides instant, high-quality translations in Second Life chat. Powered by DeepL - the world's most accurate translation service - it lets you communicate naturally with people from around the world.

Key Features

- ■ 27+ Languages - German, English, Russian, Japanese, Chinese, and more
- ■ DeepL Quality - Professional-grade translations, not Google Translate
- ■ Auto-Translation - Just chat normally, translations happen automatically
- ■ Adjustable Range - Set translation range from 5m to 100m
- ■ Two-Way - See your translations AND others' messages translated
- ■ Pay-Per-Use - Only pay for what you use, no subscription needed
- ■ Update Notifications - Get notified when new versions are available

How It Works

1. Attach the HUD and set your languages (e.g., German → Russian)
2. Chat normally in your language
3. Your message is automatically translated and shown publicly

4. Others' messages are translated privately for you
5. Reload tokens at any SmartTranslate Station when needed
