

PlantPets Marketplace Listing Overview

Overview of PlantPets

PlantPets are breedable, growing virtual plants in Second Life. They come in a wide variety of species, including limited editions and rare types. Each PlantPet begins as a seed and grows into a plant that can produce new seeds over time.

User Guide Highlights

- Seeds must be rezzed and watered to begin growing.
- Plants require regular moisture; dryness can pause growth.
- Each plant has a seed production cycle and may produce baby seeds.
- Rarity levels include Common, Uncommon, Rare, Elite, and Limited Edition.
- Menu options allow renaming, booster use, and checking plant status.

Marketplace Listing Structure

Example Listing: PlantPet Seed [Crocus *Aphrodite*]

- Description: A beautiful limited edition crocus seed that grows into a rare PlantPet.
- Permissions: Transferable seed; resulting plant is no-copy, no-transfer.
- Pricing: L\$295 (example)
- Keywords: plantpet, seed, crocus, limited edition, breedable, SL garden, virtual plant

Additional Notes

- Seeds are transferable; grown plants are not.
- Boosters can accelerate growth or seed production.
- Rarity definitions affect seed production rates and market value.
- Limited editions are seasonal or event-based and may not return.
