

KikoPets – Genetic Breedable Pet System

Welcome to the world of **KikoPets** — a living, evolving breedable pet system for Second Life.

Raise your pets, breed new generations, discover rare genetics, and build your own **unique pet lineage**.

Every pet is **alive, evolving and genetically unique**.

Features

- ✓ Genetic breeding system
 - ✓ Multiple rarity levels
 - ✓ Generational lineage
 - ✓ Pregnancy & egg incubation system
 - ✓ Automatic egg hatching
 - ✓ Interactive pet menu
 - ✓ Growth stages
 - ✓ Collection trophies
 - ✓ Low lag scripts
-

Life Cycle

KikoPets grow through several life stages:

Baby → Child → Adult → Elder → Collection

Only **Adult pets** can reproduce.

When pets reach the final stage they become **Collection Pets**, keeping their genetics as collectible trophies.

Genetics System

Each pet contains:

- Unique DNA
- Mother & Father lineage
- Generation number
- Rarity type

Breeding creates **new genetic combinations**, making every generation different.

★ Rarity Levels

- Common
- Uncommon
- Rare
- Epic
- Legendary

Rarer pets are **more valuable and harder to obtain**.

👤 Breeding System

To breed pets:

- 1 Place two **Adult pets** near each other
- 2 Both must be **healthy and happy**
- 3 They must belong to the **same incubator**

The female pet becomes pregnant 👤.

After the gestation period, the **Incubator creates an egg** which will hatch into a new pet.

🏠 Incubator

The **Kiko Incubator** manages breeding and egg creation.

It:

- Detects pregnancies
- Generates eggs
- Creates the baby pet
- Handles genetic inheritance

Without the incubator, pets cannot produce eggs.

🍖 Pet Needs

Your pets require care:

- 🍖 **Food** – keeps pets alive
- 😊 **Happiness** – required for breeding

Healthy pets reproduce more easily.

Collection Pets

When pets reach the final stage they become **Collection Pets**.

These pets:

- Stop aging
- Keep their genetics
- Become collectible trophies
- Can be displayed in your home

Perfect for **rare bloodlines and legendary pets**.

Interactive Menu

Touch your pet to access its menu.

Functions include:

- Status
- Walk / Follow
- Feed
- Rename
- Settings

Easy to use and fully interactive.
