

Skin Example

L U S T Y

Lusty Creations proudly presents The Next Generation SL Skins. Finally **YOU** are in control and can create your personal look, due to the introduction of tattoo layers and multi layering.

Now its **YOU** who decide how to combine your make up.

You decide which eyeshadow, lipstick, eyeliner or blush to use on this skin. Besides that, you can even adjust the color and gradient of the skin, the eye shadows, the lipsticks and blush. Creating your own look has never been this easy.

Our skin products contain the following items:

SKINS

You will receive 2 Folders with skins.
- 1 folder without highlighted face
- 1 folder with highlighted face.

Each Folder contains:

- Skin
- Skin Cleavage v1
- Skin Cleavage v2
- Skin with Hair base
- Skin with Hair base Cleavage v1
- Skin with Hair base Cleavage v2

All skins are also provided as a modifiable tattoo layer, so that you have the freedom to change the color and/or gradient from the skin tone.

ADDONS

These folders contain:

- 12 Full Make Ups
- 12 Eye Shadows
- 12 Lipsticks
- 18 Blushes

All layers are modifiable, so you can adjust the color and/or gradient of every layer.

This is and example

Each Skin has own Personal Make Up

BONUS ADDONS

Every skin has some bonus items, like eyeliners or moles or eyelashes.

To see the full potential of this skin, we recommend you to watch our little tutorial video on youtube: http://www.youtube.com/watch?v=AcqbevoLu_A, or read the mini tutorial on the next page.

HOW TO WEAR TATTOO LAYERS

- Go to your inventory and select the tattoo layer that you want to wear and right click -> ADD
- Do this for any tattoo layer that you want to add-on (up to 5 times) and you will be able to wear multiple tattoo layers

When you click the little SHIRT (My Appearance) icon, and go to Wearing tab, you should see all the tattoo layers you're wearing listed there, and right click "take off" to remove any layer.

Helpful tip: Tattoo layers are shown in the order that they're worn. For example, I typically wear Lipstick -> then Teeth. If you do it the other way around, teeth may be hidden under the Lipstick layer. If something doesn't show up as well, just remove it and wear it again so it sits on top the other layers.

HOW TO CHANGE GRADIENT OR COLOR OF TATTOO LAYERS

When you click the little SHIRT (My Appearance) icon, and go to Wearing tab, you should see all the tattoo layers. Select the layer you want to change. And click on the white square (default white color). In the new window you can create a gradient or color layer.

Before you consider to purchase this product be sure you use the SL 2.30 Beta Viewer, Phoenix Firestorm Beta Viewer or (future) viewers who support tattoo layers.
