

## The Claus Futon:

To access the owner menu click on the shadow. This will give you options to change the texture of the fabric on the seat, wood type and metal frame type, the size of the chair and who will have access to change these items. We suggest you set this to owner.

Claus has wonderfully thought out poses. 8 singles poses for both men and women and 4 couples poses. All poses are adjustable with easy menu commands and will save the locations of up to 100 of the most frequent users.

To adjust the sits to our avatar:

Sit on the chair

Chose the sit you want to adjust from the menu

Type /1a in the local chat window

You can now change the position and rotation of the sit or reset to the standard when the chair was purchased or rezzed.

Should you have any questions or need assistance please contact **Daedalus Brink**.

Thank you for purchasing the Arman Drafting Table Set from DAHaus.

The table and stool have single and couple poses.

The stool has single poses. A blue menu box will pop up when you sit. The access this menu again simply click on the stool. The poses are meant to work in conjunction with wearable items. Click on the pencil cup to receive a folder of items. Each item will state which pose to wear which item with.

The table holds the couple poses. The female sits on the table top itself and the male poses can be accessed by sitting on the table shadow. The poses sync automatically. Only one sitter will need to change the poses. The menu can again be brought up by clicking anywhere on the table.

Should you have questions or issues with the table or stool please contact Daedalus Brink.
