Saber Class Ship (modable)

Thank you for purchase one of Scaled Universe Ships!

The Saber-class of Federation starship was first introduced in the late 24th century, and was in full service by 2373. The ship featured a design more compact than other Starfleet vessels, and was fairly well armed despite its small size; the class has featured prominently in the Battle of Sector 001 against the Borg and in the Dominion War.
