

## GMT MESH FITTED

Dear Friens

Thank you for your interest in our new FITTED MESH product..

Fitted Mesh adjusts automatically to your body shape. That means no changes to your shape needed!

The mesh also follows certain body shape sliders. That means you can even resize our product with your shape.

You can try that by right-clicking your avatar, select "Edit my shape", choose the tab "Legs" and then for e.g. change the slider "Leg muscles".

We ask you don't go overboard with the size of certain body parts, such as breasts and hips, which, however, can be changed at your convenience

We reccomand you to use the last version of the Viewer in sl or phoenix to see perfectly our Fitted Mesh, and also we suggest you to take our demo version of the dress you'd like to buy.
